

# Explore Your Future

## *Celebrate Manufacturing Day 2016*

### at Metcam

Metcam, an Alpharetta-based fabricator of sheet metal components and assemblies for OEMs, invites you to learn about exciting technological advances and career opportunities in manufacturing.

#### Facility Open House and Tours

**Our doors are open from 1:30 – 4:00 p.m., Oct. 7** with tours running every 15 minutes. Special arrangements have been made so that students from five local high schools will tour Metcam's facility the morning of October 7. Visitors will get an up-close, behind-the-scenes look at Metcam's production facility and meet our team.

#### Learn from the Experts

Guests will learn about lean manufacturing principals from professionals who are blazing a trail for the next generation. Tours conclude in the production control center where refreshments will be served and Metcam staff will be on hand to answer questions.

#### Register Your Group

To register your school, firm or organization to attend Manufacturing Day, please contact Rose Rodriquez at [roser@metcam.com](mailto:roser@metcam.com) or call 770-817-2614. Online registration is also available at [www.metcam.com/mfgday](http://www.metcam.com/mfgday).

Metcam is located at 305 Tidwell Circle in Alpharetta, Georgia. Guests will be supplied with safety glasses and hearing protection devices. Covered shoes (no sandals or high heels) are required. Students under the age of 18 must be accompanied by parents or teachers. Student groups of 5 or more must register in advance.

#### About Manufacturing Day

Manufacturing Day is an annual national event, executed at the local level that supports hundreds of manufacturers across the nation to host students, teachers, parents, job seekers and other community members at facility open houses designed to showcase modern manufacturing technology and careers.

A panel of co-producers comprised of the Fabricators & Manufacturers Association, International (FMA), the National Association of Manufacturers (NAM), the Manufacturing Institute (MI), the National Institute of Standards and Technology's (NIST) Hollings Manufacturing Extension Partnership (MEP), and guest producer Industrial Strength Marketing (ISM) provide the centralized support necessary to coordinate this nationwide array of simultaneous events. The national media partner for the event is the Science Channel and the national movie partner is American Made Movie.
